WE ARE WELDING

EXPERT 3.0 CONTROL

EXCELLENT RESULTS IN PLAIN VIEW.
THIS CONTROL UNIT COMBINES PRECISION WITH EASE OF USE.

EXPERT
3.0

XQ

THE BEST CONTROL FOR YOU.

Intuitive. Innovative. Unbeatable. The Expert 3.0 control ensures maximum precision on every seam and delivers perfect results. In addition, it offers a variety of powerful features that put it a cut above other controls:

+ USER-FRIENDLINESS

The intuitive menu navigation and the high-resolution colour display ensure easy operation – even with demanding applications.

+ INDIVIDUAL ADAPTATION

The control can be precisely adjusted and adapted for special welding tasks to ensure a perfect result.

+ COMPREHENSIVE COMPATIBILITY + OPTIMAL WELDING QUALITY

The Expert 3.0 control is now compatible with all MIG/MAG -XQ welding machines, which gives the user maximum flexibility and makes welding even more efficient.

The welding parameters can be infinitely adjusted using the practical click wheel, ensuring maximum precision during the welding process.

+ INNOVATIVE FUNCTIONS

Modern technologies such as programmable welding JOBS and additional functions let you work more economically at the highest level.

+ ROBUSTNESS AND RELIABILITY

The control is designed for use in even the most demanding conditions and offers excellent performance over the long term.

**The Expert 3.0 control is the new EWM standard for welding.
For better quality, greater efficiency and even more flexibility.**

FAVOURITES BUTTONS +

5 favourites a with coloured status display

CLICK-WHEEL +

Click wheel for convenient operation with welder's gloves

GRAPHIC DISPLAY +

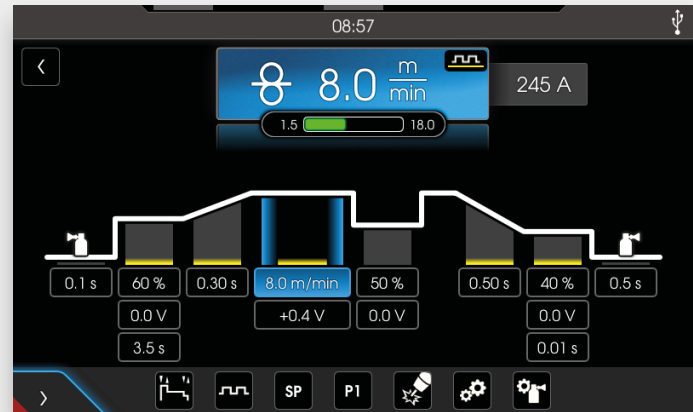

7-inch high-resolution graphic display with plain text display

USB INTERFACE +

USB interface for software updates and JOB copying

EVERYTHING WHERE YOU NEED IT

You want perfect welding results – and that's what you'll get. The Expert 3.0 control is the perfect starting point. Available for all MIG/MAG-XQ welding machines, it offers an unmatched level of intuitive operation and (virtually) limitless ways of customising your welding experience. It's time to experience welding at the highest level.

HOME SCREEN +

The home screen displays all the information needed for the procedure before, during and after the welding process. In addition, you continuously receive status information about the condition of the machine.

PARAMETER SETTING +

The parameters can be infinitely adjusted using the click wheel via the colour display. The intuitive menu navigation allows for quick adjustment, while the welding sequence is shown dynamically on the graphic display. The active setting range is marked, which makes operation considerably easier.

EXPERT 3.0

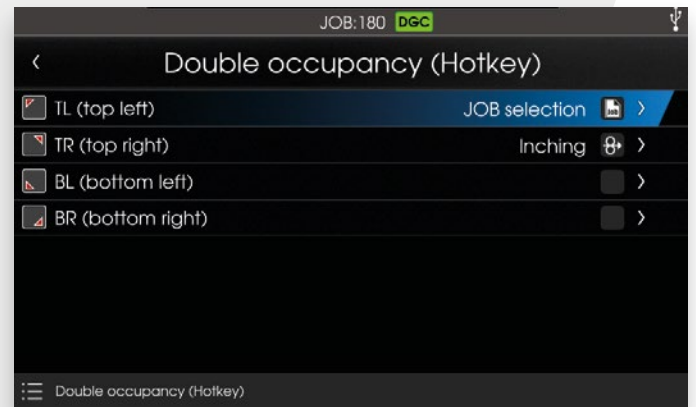

FOR MIG/MAG XQ

- 7" high-resolution graphic display with plain text display
- 5 favourites buttons with coloured status display
- Xbutton for individual access authorisation
- USB interface for software updates and JOB copying
- Click wheel for convenient operation with welder's gloves
- Hotkey buttons: reliable operation with push-buttons, the selected function are shown in the display with graphic support
- Double-assignment function for the buttons: additional customised storage of defined functions
- Home screen: all parameters and important functions at a glance and directly accessible
- Q-info screen: extensive help menu with tips and explanations

JOB-FINDER +

The JOB finder allows quick access to the appropriate welding JOBS. The user-friendly graphic display and a defined selection list allow you to set the JOB parameters quickly and easily.

HOTKEY FUNCTION +

The practical push-buttons make operation easy, even when wearing welder's gloves. A graphic support in the display clearly shows the selected functions. In addition, quick-selection buttons with double assignment (hotkey) enable simple and direct selection of functions.

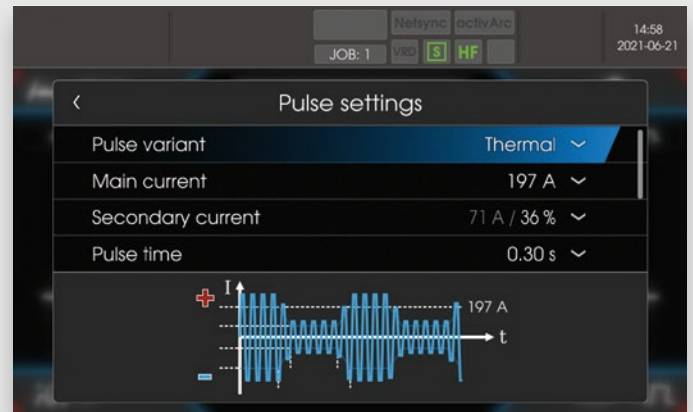

ALL THE OPTIONS, ALWAYS IN VIEW

Achieving perfect welding results has never been easier. You take care of the professional work, the Expert 3.0 control supports you in the optimal adjustment of all important parameters. Thanks to the intuitive menu navigation, high-resolution display and powerful functions, this will be child's play. You can count on it.

HOMESCREEN +

All important functions can be directly accessed on the home screen, so there's no need to waste time going through the submenus. It also shows continuous information on the machine status.

PARAMETER SETTING +

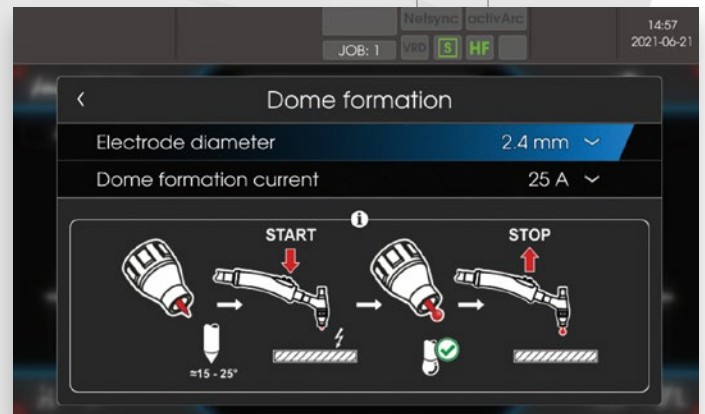

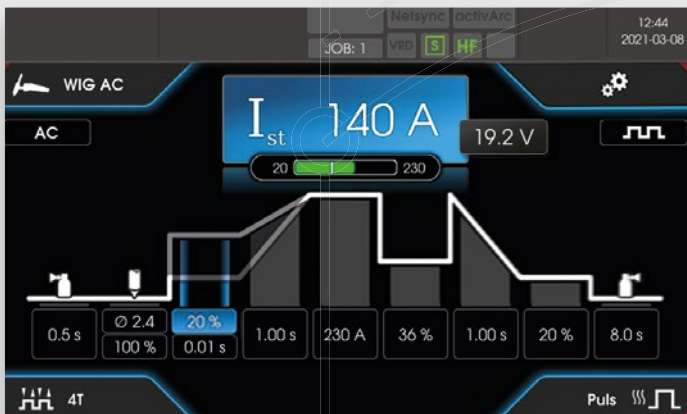

The click wheel is used to parameterise the welding process. A colour screen with dynamic graphic display supports you while the active setting range is marked, so the adjusted parameters are always visible.

EXPERT 3.0

FOR TETRINX XQ

- 7" high-resolution graphic display with plain text display
- 5 favourites buttons
- Xbutton for individual access authorisation
- USB interface for offline documentation / software updates
- Click wheel for convenient operation with welder's gloves
- Reliable push-button operation
- Customisable to your individual requirements
- Direct access to all main functions
- All parameters available at a glance
- Colour screen and graphic support for parameter setting

FLOW DIAGRAM +

On the high-resolution graphic display, all parameters in the flow diagram are graphically adjusted. This means you always have all current values in view, allowing you to weld even more efficiently.

VISUAL GUIDANCE +

The graphic user interface provides you with helpful control functions, such as clear instructions and handy quick menus. These operating aids make menu navigation particularly intuitive and user-friendly.
